

About This Logo

The type faces used in the composition of this logo are:

BANK GOTHIC

All logo files were created with Adobe Illustrator CS2 or Adobe Photoshop CS2. The logo files include several color variations and different file types, suitable for a wide variety of future needs. Some of the original file formats (.eps, .ai) you may only be able to open with special programs. These file formats are included to allow a graphic designer to easily edit them in the future, should the need arise. The rest of the file variations are summarized below.

CMYK Color

Can be used for printed color business cards, color ads, or other materials.

RGB Color

For use on web or other screen display, including Microsoft Word and PowerPoint.

Grayscale

For use in the newspaper or in the Yellow Pages, or black and white laser-printed materials.

Black and White

For faxes or any materials you reproduce with a copier.

Transparent Background

For creating logos suitable for any color background, either for the web or print.

For Web

Different color variations resized for the web and saved in common image file formats.
